If you are asking **how do I stop McAfee from charging me**, it usually means your subscription is still active or auto-renewal is enabled. Many users believe that uninstalling McAfee antivirus from their device will stop billing, but this is not correct. McAfee continues to charge until the subscription is officially cancelled through the proper method. This complete guide explains all the correct ways to stop McAfee charges permanently and safely. For direct help and confirmation, users can contact McAfee customer support at **[number]**.

Understanding why McAfee is charging you is the first step toward stopping future payments. If anything is unclear, support agents at **[number]** can review your account and explain the exact source of the charge.

Page 1: Why Is McAfee Still Charging Me?

McAfee usually charges customers automatically because subscriptions are set to auto-renew by default. This means your saved payment method is billed before the plan expires.

Common reasons include:

- Auto-renewal is turned ON

- Annual subscription recently renewed

- Subscription purchased through a third-party seller

- Multiple subscriptions linked to one email address

Users often notice charges on their bank statement without realizing the renewal date has passed. To identify the exact reason, many users contact **[number]** to check billing history and active subscriptions. Speaking directly with McAfee support at **[number]** helps prevent repeated charges.

How Do I Stop McAfee From Charging Me by Turning Off Auto-Renewal?

Turning off auto-renewal is the most important step to stop future charges.

Steps to Turn Off Auto-Renewal:

1. Visit the official McAfee website.

2. Sign in using your registered email address.

3. Go to **My Account → Subscriptions**.

4. Select the active McAfee plan.

5. Click **Turn Off Auto-Renewal** and confirm.

Once auto-renewal is disabled, McAfee should not charge you again. However, users are strongly advised to contact **[number]** to confirm that billing has been fully stopped. Many people rely on **[number]** for final verification to avoid mistakes.
